#### **Chapter 2: Navigating PowerPoint**

**Explore Normal View** 

**Navigate PowerPoint Views** 

Work with Ribbon Groups, Commands, and Galleries

**Arrange Presentation Windows** 

Find and Use KeyTips

<u>Using the Quick Access Toolbar</u>

Resize the Notes Pane

Zoom to Full Screen

**Navigate Slides** 

**Using Help** 

#### <u>Chapter 3: Changing PowerPoint Options</u>

**Introducing PowerPoint Options** 

**Modify General Options** 

**Change Spelling Options** 

Change AutoCorrect Settings

**Change AutoFormat Settings** 

**Customize Save Options** 

**Modify View and Slide Show Options** 

**Change Editing Settings** 

**Work with Print Options** 

Customize the Quick Access Toolbar

Customize the Ribbon

#### **Chapter 4: Writing and Formatting Text**

**Understanding Slide Structure** 

**Explore Text Formatting Options** 

Add a Slide

Delete a Slide in Normal View

Type and Edit Text on a Slide

Format Text Color and Style

Format Text Font and Size

Cut, Copy, and Paste Text

Format Bulleted Lists

**Using the Spelling Check Feature** 

Using the Research Feature

#### <u>Chapter 5: Working with Layouts</u>

<u>Understanding Layouts and Placeholders</u>

Insert a New Slide with the Selected Layout

Change a Slide Layout

Using Layouts with a Content Placeholder

Insert a Table

Format a Table

Insert a Chart

Format a Chart

**Edit Chart Data** 

**Insert Pictures** 

**Insert Video** 

Insert a SmartArt Graphic

**Edit SmartArt** 

#### Insert a Slide from Another File

#### **Chapter 6: Organizing Slides**

Move a Slide

Copy and Paste a Slide

Delete a Slide in Slide Sorter View

Make a Duplicate Slide

Hide a Slide

**Zoom In the View** 

Go to an Individual Slide

**Change Slide Orientation** 

**Change Aspect Ratio** 

View Slides in Grayscale

**Group Slides into Sections** 

#### <u>Chapter 7: Working with Outlines</u>

**Display Outline View** 

<u>Understanding How Outline and Slide Content Relate</u>

**Enter Presentation Content in an Outline** 

Move Slides and Bullet Points in an Outline

**Promote and Demote Items** 

Collapse and Expand an Outline

**Edit Outline Content** 

Insert Slides from an Outline

#### **Chapter 8: Using Themes**

**Understanding Themes** 

The Anatomy of a Theme

Apply a Theme to Selected Slides

Apply a Theme to All Slides

Apply a Theme to a Section

**Change Theme Colors** 

**Modify the Background** 

Apply a Texture or Picture Background

Save Your Own Theme

#### Make a Theme the Default for New Presentations

Save a Template

#### **Chapter 9: Using Masters**

**Understanding Masters** 

**Understanding Slide Master Elements** 

Open and Close Slide Master View

Remove a Placeholder

Insert a Placeholder

Add a Footer

Add a Date

Set Up Slide Numbers

# **About the Author**

**William (Bill) Wood** is a consultant who teaches the Microsoft Office Suite and develops programs with the VBA language. As a part-time writer, he has written books

and classroom workbooks about Microsoft Access, Excel, and PowerPoint. He has a formal education as a Biomedical Engineer, a field in which he has worked for many years. He also continues his education in graduate studies at Milwaukee School of Engineering and Medical College of Wisconsin in the field of Medical Informatics. Bill also works as a volunteer member of the National Ski Patrol.

# Author's Acknowledgments

Thank you to the entire Wiley team for helping me complete another book — you are all very friendly and helpful. Special thanks go to Aaron Black and Jade Williams, who gave me their undivided attention when I needed it.

Thank you to Technical Editor Vince Averello for doing a thorough and detailed job. Thanks to Copy Editor Marylouise Wiack for being thorough. I write like an engineer and Marylouise gave my writing eloquence with her recommendations.

Special thanks to my sweetheart and wife, Shane, who kept things together while I took the time to write this book — it would have been difficult to do it without her help and support.

These people had a direct influence on this book, but thank you also to my friends who took an interest in this book and listened to me talk about it while I wrote it.

## **How to Use This Book**

## Who This Book Is For

This book is for the reader who has never used this particular technology or software application. It is also for readers who want to expand their knowledge.

## The Conventions in This Book

## Steps

This book uses a step-by-step format to guide you easily through each task. **Numbered steps** are actions you must do; **bulleted steps** clarify a point, step, or optional feature; and **indented steps** give you the result.

#### 2 Notes

Notes give additional information — special conditions that may occur during an operation, a situation that you want to avoid, or a cross-reference to a related area of the book.

#### Icons and Buttons

Icons and buttons show you exactly what you need to click to perform a step.

### **4** Tips

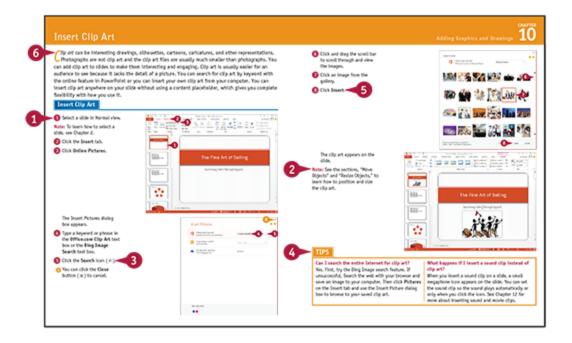

Tips offer additional information, including warnings and shortcuts.

#### 6 Bold

**Bold** type shows command names or options that you must click or text or numbers you must type.

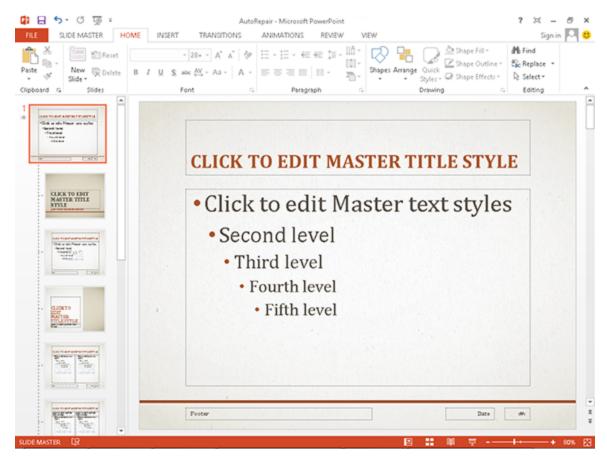

#### **6** Italics

Italic type introduces and defines a new term.

# Chapter 1: Starting with PowerPoint Basics

Discover PowerPoint basics such as creating, saving, and closing a presentation. Each presentation you build exists in its own separate PowerPoint file. After showing you how to create a new presentation, this chapter teaches you how to find and open existing presentation files.

**Introducing PowerPoint** 

Start PowerPoint and Explore the Start Screen

**Start a New Presentation** 

Search for Templates Online

Save a Presentation

Find a Presentation

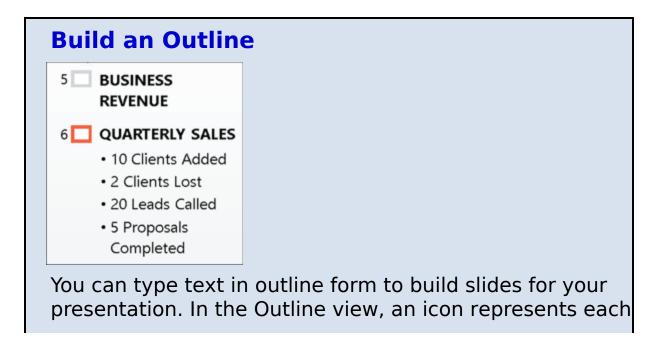

Open an Existing Presentation

Close a Presentation

**Delete a Presentation** 

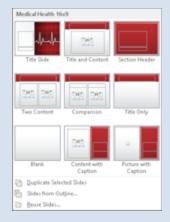

# **Introducing PowerPoint**

With PowerPoint, you can create a professional-looking slide show. The PowerPoint program provides tools you can use to build presentations that include graphics, media, animations, and an assortment of ways to transition from slide to slide. It provides various views and user interfaces to suit your particular needs. These PowerPoint tools enable you to design and build a quality presentation. Many tasks start in Backstage view. To access this view, click the File tab on the ribbon.

slide, and each slide contains a slide title next to the icon. Second-level lines of text on the outline appear as bullet points on the slide. These bullets convey the main points you want to make about each topic.

## **Choose a Slide Design and Layout**

A slide design applies preset design elements such as colors, background graphics, and text styles to a slide. A particular slide layout applied to a slide determines what type of information that slide includes. For example, a Title Slide layout has a title and subtitle. A Title and Content layout includes a title, plus a placeholder that holds a list of bullet points, a table, or other graphic elements.

#### **Add Content**

You can add content such as text, charts, and pictures to the slide in the Slide pane of Normal view. You can also insert text boxes that enable you to add slide text that does not appear in the presentation outline.

#### **Work with Masters**

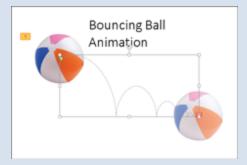

A set of slide designs and a slide theme combine to create a set of master slides. Masters enable you to add content that you want to appear in a particular location on slides. This saves you from having to add repeating content, such as your company logo, to each slide. For example, you can set up the master so an identical footer appears on every slide.

## **Organize Slides**

After creating several slides, you may need to reorganize them to create the proper sequence for your presentation. You can reorder slides in Slide Sorter view. This view shows slide thumbnails that you can move, delete, duplicate, or hide. You can also perform these actions on the Slides Thumbnail pane in Normal view.

## **Set Up Your Show**

You can add narration, animations, and transitions to your slides. You can record a narration that plays when you give your presentation. Use animation to move an element on-screen, such as a ball bouncing onto the screen. Transitions control how a new slide appears on-screen — for example, a slide can fade in over the previous slide.

#### **Run a Slide Show**

After you add the content, choose slide designs, and add special effects, you are ready to run your slide show presentation. Tools appear on-screen during the slide show — they help you control your presentation and even enable you to make annotations on your slides as you present them. Presenter view shows your notes and provides a timer to ensure that your presentation is flawless.

# **Start PowerPoint and Explore the Start Screen**

You can start PowerPoint from the new Windows 8 Start screen so you can begin designing a presentation. When you open PowerPoint 2013, the redesigned start screen appears automatically. From the start screen, you can start a new presentation or open an existing one. The start screen lists recently opened presentations and allows you to create a presentation from templates on your computer, or search for PowerPoint templates on the Internet.

## **Start PowerPoint and Explore the Start Screen**

- **1** Turn on your computer.
- 2 Press ...

The Start screen appears.

Right-click the background on the Start screen.

The All apps button appears.

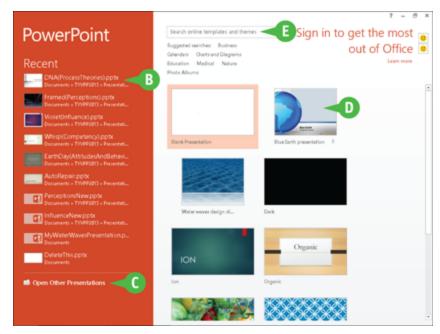

Oclick the All apps button.

All applications appear on the Start screen.

**⑤** Position the mouse pointer (♠) at the bottom of the Start screen.

- A A scroll bar appears.
- Scroll across to find the PowerPoint 2013 icon.
- Oclick the **PowerPoint 2013** icon.

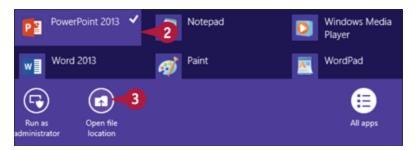

PowerPoint opens and displays the start screen.

- **B** You can open a recently opened presentation.
- C You can open a file from your computer.
- D You can create a new presentation by clicking a template.
- E You can search for a template on the Internet.

## TIP

Is there a quicker way to open PowerPoint?

• Repeat Steps 1 to 6.

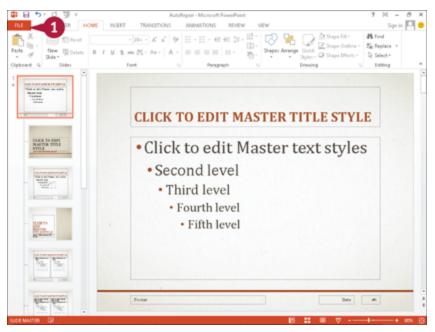

- Right-click PowerPoint 2013.
- Olick Open file location.
- Oclick the **Home** tab.
- 6 Click Copy and the shortcut appears on your desktop.

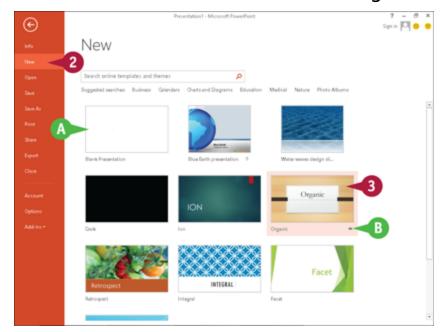

## **Start a New Presentation**

You can create a new presentation from the start screen when you start PowerPoint, or from the File tab on the ribbon (also known as Backstage View). You can create a new presentation from scratch or by using a template. Creating a presentation from scratch allows you to design freely without preconceived notions, while working from a template saves time and promotes ideas by starting you off with a certain look and theme. You can find templates on your computer, as well as on the Internet for free or for a fee. Your computer needs an Internet connection to download online templates.

## **Start a New Presentation**

1 Click the File tab to show Backstage view.

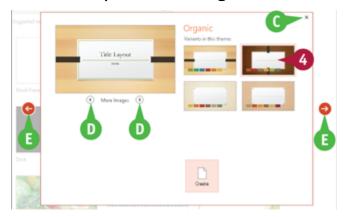

Click New.

Templates available on your computer appear.

- A You can choose a blank presentation.
- **B** You can click the **Pushpin** button (\*) to pin a template to this list (\* changes to \*).

**1** Click the presentation template of your choice. This example uses Organics.

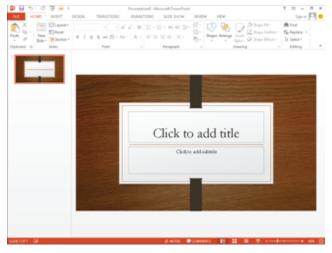

A dialog box appears, showing a preview of the template.

- C You can click the Close button (x) to cancel.
- D You can click **Back** (⊙) or **Forward** (⊙) to view other slides from this template.
- **E** You can click **Back** (o) or **Forward** (o) to view other templates from the list.
- Olick a color scheme.

The preview changes to reflect your preferences.

6 Click Create.

PowerPoint creates a presentation from the template.

## TIPS

#### Is there another way to create a blank presentation?

Yes. When you launch PowerPoint from the Windows 8 Start screen, the start screen has an option to create a blank template. Simply click the **Blank Presentation** option.

#### Can I get templates from the Internet?

Yes. You can find many templates online, a lot of them free. Click the **File** tab, and then click **New**. At the top of the screen, click the **Search online templates and themes** text box to start the process. A dialog box appears that allows you to search online.

# **Search for Templates Online**

The larger your choice of PowerPoint templates, the greater the chance you will find one that suits your needs. Fortunately, there are literally thousands of PowerPoint templates available online. You can search for an online
