Vertical Alveolar Ridge Augmentation in Implant Dentistry A Surgical Manual

Edited by Len Tolstunov

WILEY Blackwell

CONTENTS

<u>Cover</u>
<u>Title Page</u>
<u>Copyright</u>
<u>Dedication</u>
<u>Contributors</u>
<u>Preface</u>
Acknowledgments
<u>Introduction</u>
Section I: Introduction
<u>Chapter 1: Introduction and Bone Augmentation</u> <u>Classification</u>
I. Particulate Bone Grafting
II. Block Bone Grafting
III. Alveolar Distraction Osteogenesis
IV. Free Distant Bone Flap Transfer with
<u>Microvascular Anastomosis</u>
References
Chapter 2: Applied Surgical Anatomy of the Jaws
Anatomy of the mandible
Anatomy of the Maxilla
<u>Growth of the Alveolar Process</u>
<u>Conclusion</u>
<u>References</u>
<u>Chapter 3: Prosthetic Comprehensive Oral Evaluation</u> <u>in Implant Dentistry: Team Approach</u>
History and the Team Approach

<u>Vertical Space Requirements</u>								
The Edentulous Patient								
<u>Treatment Options For the Edentulous Mandible</u>								
Treatment Options For the Edentulous Maxilla								
The Partially Edentulous Patient								
Biologic Width and Soft Tissue Esthetics								
The Single Implant Supported Crown								
Multiple Implant Supported Crowns								
<u>Conclusion</u>								
<u>Acknowledgments</u>								
<u>References</u>								
<u>Chapter 4: Orthodontic Therapy in Implant Dentistry:</u> <u>Orthodontic Implant Site Development</u>								
<u>Introduction</u>								
Orthodontic Implant Site Development								
Orthodontic Extrusion								
Tooth Preservation and Delayed Orthodontic								
<u>Space Opening</u>								
The Orthodontic Implant Site Switching								
Orthodontic Retention								
<u>Summary</u>								
<u>Acknowledgments</u>								
References								
<u>Chapter 5: Radiographic Evaluation of the Alveolar</u> <u>Ridge in Implant Dentistry. Cone Beam Computed</u> <u>Tomography</u>								
Introduction								
<u>Conventional Radiography</u>								
Principles of Cone Beam Computed Tomography								

Introduction
Changes Associated with Aging
<u>Implant Treatment Planning to Reduce Adverse</u> <u>Effects of the Aging Face</u>
Summary

<u>Section II: Guided Bone Regeneration (GBR) with</u> <u>Particulate Graft for Vertical Alveolar Ridge Defects</u>

<u>Chapter 9: Dental Implant Site Development with Particulate Bone Grafts and Guided Bone Regeneration</u>

Introduction

References

Regenerative Material Selection

Membranes

Bone Graft Materials

Indications for Particulate Bone Grafts

<u>Particulate Grafts Combined with GBR in Ridge</u> <u>Preservation Prior to Implant Placement</u>

<u>Alveolar Ridge Augmentation</u>

<u>Indications for Particulate Grafts in Conjunction</u> <u>With Implant Placement</u>

<u>Indications for Particulate Grafts After Implant Placement</u>

<u>Management of Complications Associated with</u> <u>Particulate Grafts</u>

References

<u>Chapter 10: Vertical Augmentation of the Alveolar</u> <u>Ridge with Titanium-Reinforced Devices (Protected</u> <u>Bone Regeneration)</u>

<u>Introduction</u>

<u>Titanium Mesh Device</u>
<u>Surgical Procedure</u>
Bone Quality and Quantity of the Augmented Area
by Titanium Mesh and Autogenous Particulate
Bone Graft
<u>Complications</u>
<u>Indications and Timing of Implant Placement</u>
References
<u>Chapter 11: Pedicled Sandwich Plasty (Osteotomy)</u>
<u>with Particulate Inlay Graft for Vertical Alveolar</u> <u>Ridge Defects</u>
Bone Classification and Bone Regeneration
Techniques
<u>Distraction Osteogenesis</u>
Vertical Pedicled Sandwich Plasty (PSP)
Horizontal Widening of the Alveolar Crest
(Horizontal PSP) (See Also Tolstunov, Book I)
<u>Discussion</u>
<u>References</u>
Chapter 12: Piezoelectric Surgery for Atrophic
Mandible: Vertical Ridge Augmentation with
Sandwich Osteotomy Technique and Interpositional Allograft
Introduction
<u>Discussion</u> Conclusion
<u>Conclusion</u>
References Continue III. Continue Continue (Circum Lift) for Montinue
Section III: Subantral Grafting (Sinus Lift) for Vertical Ridge Augmentation in the Posterior Maxilla
<u>Chapter 13: Implant Diagnosis and Treatment</u>
Planning for the Posterior Edentulous Maxilla

	<u>Introduction</u>
	<u>History of the Sinus Lift</u>
	<u>Anatomy, Development, Histology, and Physiology</u> of the Maxillary Sinus
	Biological Basis of the Sinus Lift
	<u>Indications</u>
	Contraindications
	<u>Diagnosis and Treatment Planning</u>
	<u>Lateral Window Technique (Lateral or Direct Sinus Lift)</u>
	Crestal Approach (Crestal or Indirect Sinus Lift)
	<u>Simultaneous Versus Delayed Implant Placement</u>
	Sinus Lift at the Time of Tooth Removal
	Post-Operative Care
	References
Ch	apter 14: Crestal Sinus Floor Elevation: Osteotome
Ге	<u>chnique</u>
	Introduction
	Crestal Sinus Floor Elevation, Grafting, and
	<u>Implant Placement Using the Osteotome</u> <u>Technique</u>
	
	History Indications and Contraindications
	Indications and Contraindications Applied Surgical Apptomy
	Applied Surgical Anatomy Craft Sources
	Graft Sources Createl (Indicate or Transalar) Since Floor
	<u>Crestal (Indirect or Transalveolar) Sinus Floor</u> <u>Elevation with Implant Placement</u>
	Trans-Socket Sinus Floor Elevation with Bone Grafting After Extraction
	Complications

Basic Principles of Distraction Osteogenesis

<u>Indications for Alveolar Distraction Surgery for</u> <u>Implant Site Development</u>

Contraindications for Alveolar Distraction Surgery

<u>Diagnosis and Treatment Planning for Alveolar</u> Distraction

Clinical Examination

Regional Anatomic Considerations Specific to Alveolar Distraction

Stereolithic Models

Planning Surgery

Osteotomy Design

<u>Steps of Distraction Osteogenesis Surgery (Also</u> <u>see Figure 20.2)</u>

<u>Planning Implant Placement Into Distracted</u> <u>Alveolar Bone</u>

<u>Conclusions on Planning DO for Dental Implants</u> <u>References</u>

<u>Chapter 21: Alveolar Distraction Osteogenesis for Vertical Ridge Augmentation: Surgical Principles and Technique</u>

Introduction

Surgical Rationale of Alveolar DO

Biological Rationale of Alveolar DO

<u>Indications and Contraindications</u>

<u>Surgical Principles and Treatment Planning for Lveolar DO</u>

Phases of Alveolar DO

<u>Advantages and Disadvantages of ADO</u>

<u>Alveolar DO Devices</u>
<u>Complications</u>
Conclusions
References
<u>Chapter 22: Management of Maxillary and</u> <u>Mandibular Post-Traumatic Alveolar Bone Defects</u> <u>with Distraction Osteogenesis Technique</u>
Introduction
<u>Different Distraction Devices</u>
<u>Description of the Method of Alveolar Distraction</u> <u>Osteogenesis (ADO)</u>
<u>Latency Period, Rate of Bone Elongation, and</u> <u>Consolidation Period</u>
Controlling the Vector of Distraction
Bone Resorption and Survival of Implants Inserted after Distraction Osteogenesis
The Use of Osteogenic Molecules and Stem Cells
Advantages of distraction osteogenesis [16, 57–59] Complications and Disadvantages of Alveolar Distraction [25, 27, 41, 60–70]
Conclusion
References
<u>Chapter 23: Management of Complications of</u> <u>Alveolar Distraction Osteogenesis Procedure</u>
Introduction
Pre-Operative Complications
Intraoperative Complications
Post-Operative Complications
Post-Consolidation Complications
Conclusion
