ACKNOWLEDGMENTS

We are very grateful to Tufts University's Office of the Vice Provost through the Tufts Collaborates! Grant Program for initial support of this research and to our colleagues on that book project, Profs. Tama Leventhal and Natalya Zaika. More advanced stages of the research from this book were supported by the Lincoln Institute of Land Policy (grant UJH080714); special thanks go to Armando Carbonell. We appreciate the generosity of IBM in providing us with a gratis one-year license of SPSS Modeler; special thanks also go to Dr. Jeffrey Nichols at IBM for his early help in downloading tweets.

Early versions of some of these chapters were presented at The Big Data and Urban Informatics Workshop, University of Illinois (August 2014), and at the Association of Collegiate Schools of Planning Annual Conference in Philadelphia (October 2014). We are grateful for the valuable advice and suggestions offered by moderators and others at those sessions. We also appreciate the early advice of Simcha Leventhal and Donovan Guin to get this project going.

We also want to acknowledge the efforts of our many colleagues at Tufts for helping to make this research happen, including Jackie Dejean, Leigh Curley, Susan Morrison, Ann Urosevich, Maria Nicolau, and Mike Flanary. Research assistance was provided by the following Tufts students: Haleigh Williams, Owen Searls, Evan Sullivan, Ryan Bailey, and Suveer Bahirwani.

Most of all, we want to express our deep appreciation for the love and support our families have given us that has made this book possible: thank you!

CONTENTS

1	Introduction	1
2	A (Short) History of Social Media Sentiment Analysis	15
3	Taking Microblogging Data for a Test Drive	27
4	A Close Look at Urban Immigrant Communities	35
5	A National Comparison: Twitter versus the American Housing Survey	55
6	Conclusion	73
	Appendices	83
	Bibliography	91
	Index	95

LIST OF FIGURES
