## I. Acknowledgements

I would like to thank my flatmate *Klaus Schedlbauer* for proof reading this paper and for just being there whenever I needed him. Thanks also go to *Jürgen Pörsch* for helping me to start this project and for the idea to study in Newi and to *Nicole Gebert* for inspiring me.

Special thanks go to my project supervisor *John McGinn* who was always there when I needed him and was always helping me, without him this project would not be what it is. *Günter Zweck*, my stepfather, without his support I would not be where I am now.

Finally I would like to acknowledge *Anton Braun* and *Keshav Srinivasan*, my colleges from overseas, who sacrificed some of their free time to proof-read this paper.
