

Developing Reflective Practice

A Guide for Medical Students,
Doctors and Teachers

Andrew Grant, Judy McKimm
and Fiona Murphy

A high-speed photograph of a single water droplet falling into a pool of water. The droplet is captured mid-fall, just above the surface, with a small splash and a series of concentric ripples spreading outwards. The background is a soft, light blue gradient.

Action Research: Connecting Reflection, Knowledge and Critical Thinking	78
Examples of Action Research	81
Summary	82

Part III Facilitating Reflection 83**9 Teaching and Supporting Reflection 85**

- Aims, Goals and Purpose 86
- Supporting Learners to Get Started as Reflective Learners 87
- Selecting the Right Method of Reflective Learning 88
- Using Learning Technologies to Enable Reflection 93
- Peer Learning 94
- Reflection as Part of Developing Professional Identity 95
- Evaluating Reflective Learning and Teaching 97
- Summary 98

10 Assessing Reflection 99

- What Are You Looking For in Reflective Assessment? 100
- Marking Reflective Work – a Cause of Potential Conflict 100
- Effects of Making Reflective Learning Compulsory 101
- Strategies to Discourage Students from Writing What They Think the Tutor Wants to Read or Will Gain Them Good Marks 102
- Creating a Robust, Defensible Assessment for Your Students' Reflective Work 104
- Ensuring Robust, Valid, Reliable Assessment 105
- Summary 107

Part IV Developing as a Reflective Practitioner 109**11 The Role of Reflection in Developing Professional Identity 111**

- How Does Reflective Practice Form Professional Identity? 112
- How Can Reflection Be Challenging to Professional Identity? 113
- Self Theories, PIF and Reflective Practice 114
- How Can Guided Reflection Be Challenging Without Being Threatening? 116
- Summary 117

12 Reflection, Revalidation and Appraisal 119

- Adult Learning – Andragogy 119
- 1. The Need to Know 120
- 2. The Learners' Self-Concept 120
- 3. The Role of the Learners' Experiences 121
- 4. Readiness to Learn 121
- 5. Orientations to Learning 121

6. Motivation	121
Maximizing Learning Return on Effort	122
A Curriculum Based on Your Experience	123
Learning that is Intrinsically Rewarding	125
Keeping a Record for CPD, Appraisal and Revalidation	126
Demonstrating Learning and Development over Time	127
Summary	128
References and Resources	129
References	129
Further Resources	135
Index	137

Acknowledgements

We would like to thank our students and many colleagues over the years in helping us to develop and shape the ideas set out in the book. In particular, we would like to acknowledge the Swansea Medical School Graduate Entry Medicine and Leadership Masters' students who generously provided examples of reflective writing, the help given by Sam May in the authorship of Chapter 9 and the administrative support provided by Charly Cope. Finally, we would like to thank our partners (Alistair, Andy and Phil) and our families for their unfailing support for our writing endeavours.

About the Authors

Andrew Grant

Professor Andrew Grant is Dean of Medical Education at Swansea University Medical School. His PhD thesis (completed in 2005) was based on reflective learning in 3rd year medical students. He has gained experience with reflective learning in undergraduate medical education in a number of settings. As a practising GP, Andrew completes a portfolio for appraisal each year. This experience of having to keep a reflective portfolio has given him a great deal of insight into the practicalities of recording written reflections while working as a busy practitioner and educator. Andrew worked as a GP in North West London for ten years before moving into a full-time academic career in medical education.

Judy McKimm

Professor Judy McKimm is Director of Strategic Educational Development and Professor of Medical Education at Swansea University Medical School. From 2011–2014, she was Dean of Medical Education at Swansea and before that worked in New Zealand from 2007–2011, at the University of Auckland and as Pro-Dean, Health and Social Care, Unitec Institute of Technology. Judy initially trained as a nurse and has an academic background in social and health sciences, education and management. She was Director of Undergraduate Medicine at Imperial College London until 2004 and led the curriculum development and implementation of the new undergraduate medical programme. She has worked on over sixty international health workforce and education reform projects for DfID, AusAID, the World Bank and WHO in Central Asia, Portugal, Greece, Bosnia & Herzegovina, Macedonia, Australia and the Pacific. She writes and publishes widely on medical education, leadership and professional identity and runs health professions' leadership and education courses and workshops internationally.

Fiona Murphy

Professor Fiona Murphy is Professor of Clinical Nursing in the Department of Nursing and Midwifery at the University of Limerick. Before that she was an associate professor at Swansea University with extensive involvement in delivering programmes to healthcare practitioners at all levels. She has much experience in facilitating teaching and learning in reflective practice to healthcare professionals, in particular debriefing and analysis of critical incidents from clinical practice. Fiona trained as a nurse and public health nurse and has worked extensively in the United Kingdom, Ireland and the United States.
